## All the performance. All the time.

"It just never fails." That's how users perceive the world's top-selling LC from Agilent. Every system is packed with highest quality parts for highest uptime and longest maintenance intervals.

### Infinitely more **affordable**

The Agilent 1220 Infinity LC is a high quality, integrated system for routine HPLC and advanced UHPLC analysis, for maximum return on investment.

### Infinitely more **confident**

The Agilent 1260 Infinity LC raises the standard in HPLC – without raising the price. It offers new levels of productivity, data quality and robustness to give you highest confidence in your investment.

### Infinitely more **powerful**

The Agilent 1290 Infinity LC is the last word in chromatographic performance providing highest speed, resolution and sensitivity – now with ISET\*.

## Infinitely better uptime

When you purchase a new 1200 Infinity Series LC, we'll give you a 3 or 5-year up-and-running guarantee\* –for FREE!

Check out which configurations come with total repair coverage based on Agilent Advantage Bronze service plan, preventive maintenance and detector lamp exchange.

Configurations	Guarantee
1290 Infinity LC with Variable Wavelength Detector	5-year
1290 Infinity LC with Diode Array Detector	5-year
1260 Infinity Binary LC with Variable Wavelength Detector	5-year
1260 Infinity Binary LC with Diode Array Detector	5-year
1260 Infinity Quaternary LC with Variable Wavelength Detector	3-year
1260 Infinity Quaternary LC with Diode Array Detector	3-year
1220 Infinity Gradient LC	3-year

Can't find your desired system in the list? Contact your Agilent representative for custom configurations.

\* ISET –Intelligent System Emulation Technology

\* Regional differences might occur, please contact your local Agilent representative.

## Advantage Bronze service

With Agilent Advantage Bronze, you get the peace of mind and security that comes with knowing you are fully protected against costly repairs and extended instrument downtime.

Agilent Advantage Bronze covers all costs of onsite repair including engineer travel and labor, as well as coverage of all parts required, including consumables, to return your system to normal operations. Plus, as an Agilent Service plan customer, your service requests will be given preferred scheduling over time and materials calls.

**Act TODAY – ask your Agilent representative for a quotation!**

## Preventive maintenance

The up-and-running guarantee includes Agilent's preventive maintenance service to maintain peak performance and extend your instruments' useful life.

Encompassed in the preventive maintenance service are full inspection, cleaning, adjustments and replacement of consumables according to factory protocols. For example, the pump head seal, purge valve seal, and filter assembly frits are replaced.

## Detector lamps

The 3-year guarantee includes exchange of one lamp for your 1200 Infinity Series variable wavelength or diode array detector – the 5-year guarantee includes exchange of two lamps!

Only Agilent lamps are designed and built to match Agilent instruments:

- Built to the tightest specifications and quality standards
- Designed to increase light intensity and decrease noise
- Rigorously tested for lowest lamp-to-lamp variability
- Stable, robust and long-lasting to lower the cost of ownership
